

Care Coordination Workgroup Panel

February 12, 2015

Dr. Howard Haft

Dr. Ramani Peruvemba

Craig Behm

Care Coordination Programs

- MedChi Network Services created to support the private practice of medicine and improve quality
 - Adoption and Meaningful Use of EHRs
 - Formation and operations of 3 MSSP Accountable Care Organizations coordinating care for 27,000 Medicare beneficiaries
- Partner on Transforming Clinical Practices Initiative with CRISP, MHCC, MLC
- Working with CRISP, hospitals, and community organizations to form Regional Partnerships for HSCRC
- Physicians are ready to participate if the program will help them continue to provide excellent care

Program Priorities

- Interoperability
 - Data must be shared in a uniform way
- Universal Participation
 - All physicians must have the opportunity to join in these initiatives
- Transparency
 - Clarity and availability of data use and incentive calculations
- Equity
 - Programs must be fair to all parties and include adequate patient protections and checks and balances
- Simplicity
 - Programs must be standardized across regions, adapt to reasonable physician workflows, and align with other initiatives

Thank you for the opportunity to share our thoughts!
